# Mission

Basically, whatever you need to be done, we can do. We are a pure service provider. Meaning, we will service your ship (s) in the best way possible. Going the extra mile is our pleasure and a superintendent that contracts us, can count on a job well done within the scheduled time and qualifications required. What distinguishes us is our passion for our job. We love ships and like to be challenged. We offer a turnkey solution. In a scheduled docking different jobs (e.g. bow thruster, stern seals and propeller) are combined. Getting it all done in time, takes some logistics. Leaving everything to just one company is much more convenient. MICS Propulsion & Hydraulics offers you one-stop-shopping.

## ABOUT MICS GROUP

MICS Propulsion & Hydraulics takes pride in differentiating its service from other competitors through its experienced team. The group is quick to respond and handles all inquiries in an expeditious manner.

MICS Propulsion & Hydraulics is a small company that employs closely monitored overhead control systems and has no bank debt. This allows us to keep our margins to a minimum and provides very competitively priced products and services.
